

# Nursing B.Sc. for experienced professionals - Hof University — Hof University

Source: <https://www.hof-university.com/studying-at-hof-university/our-degree-programs/nursing-bsc-for-experienced-professionals.html>

By successfully completing the part-time degree program "Nursing (B.Sc.)", you will earn the qualification of Registered Nurse (B.Sc.) with an academic degree. This qualification enables you to approach everyday challenges in healthcare analytically and reflectively, and to handle complex nursing tasks and processes even more effectively by incorporating the latest research findings.

Is patient-centered, comprehensive nursing care important to you? Would you like to take an active role in shaping and managing highly complex nursing processes? Are you eager to apply your knowledge directly alongside your professional work and help advance patient care? Are you already working in nursing and want to complement your professional practice with advanced expertise and an academic education? Do you want to tackle the megatrends in healthcare and develop practical solutions?

If this sounds like you, then our Nursing B.Sc. program is the perfect fit!

You will become a visionary nursing professional, collaborating with colleagues, recognizing their potential, and integrating it into patient care. With your knowledge, understanding of the healthcare system, and strong research skills, you will support patients, people in need of care, and even healthy individuals alike. This prepares you to meet the demands of modern healthcare and to develop innovative solutions for the future.

Through exchange within your study group and the freedom to think and reflect, you will experience how much education can empower and energize you in everyday life.

Education. Network. Freedom. Thinking.

You are studying part-time.

Your studies consist of:

On-site block seminars at our learning location in Bamberg, which take place on average once a month (usually on Thursdays and Fridays), and

Guided self-study, during which you engage more deeply with the content you have learned.

In addition, you will make use of self-study time, as your strong motivation for professional specialization drives you to seek out and explore further in-depth information.

The standard period of study is four semesters on a part-time basis. Competencies acquired during your previous vocational training — up to 105 ECTS credits — are already taken into account.

The courses are offered in a blended learning format, combining in-person sessions and guided self-study. On average, you will be on campus two days per month for lectures and seminars.

Planned modules (subject to change, as the study and examination regulations are not yet finalized):

Recognition of prior nursing training: 105 ECTS

Planned modules for the study phase:

Reflected Practicing I, II, III

Health Promotion and Prevention

Change and Project Management

Digitalization in Healthcare

Understanding Healthcare Systems

Advanced Nursing Expertise

Intercultural Training

Research Workshop

Internship

## Bachelor's Thesis

Here you can find more information about thecourse of studies.

The program qualifies you, for example, to work as anursing professional in direct patient care.

Our shared goal is toimprove patient care. This degree equips you toact in a project-based way, drivechange processes, and make an impactdirectly within your team and work environment.

What you bring with you:

Successfully completed trainingas a nursing professional\*, ideally with professional experience

Higher education entrance qualification, e.g., (technical) high school diploma, or a vocational training with at least3 years of full-time professional experience

For international students:Language proficiency in German(at leastlevel B2,proven by official test score documents)

For more information onstarting your studies without a high school diplomausing a professional qualification as university entrance, visit ourAdmissions page

\*Note: Tuition fees are generally consideredtax-deductible professional expenses.

Do you needfinancial support during your studies? Here you can find an overview of possiblesscholarship programs and study funding options. TheFoundation for the Promotion of Talented Vocational Educationalalso offers corresponding scholarship programs.

Our joint success story

"A nursing degree enables you to understand complex interconnections in healthcare and nursing, make research-based decisions, and use theoretical knowledge to introduce new approaches in practice that go beyond the practical skills of traditional training."(Prof. Dr. Matthias Drossel, Program Director)

Nursing is a field ofhigh relevance, where demands are constantly evolving. Thesensitivity inherent to this profession– providing the best possible and continuously improving patient care – must remain the central focus. With all our expertise and passion, we prepare you for these areas so that your patients receive exactly what makes your profession so rewarding:better outcomes!And making a difference brings happiness.

Thanks to our program-specific focus onsector-specific areas of practice, you can shape your career pathindividually. In addition to key professional skills, you will also gaincross-disciplinary competencies, such as making informed professional decisions based on thelatest nursing research.Digitalizationis another important topic. While you won't become an IT specialist or need advanced technical skills, it's crucial to become familiar with this megatrend.

The combination oftheory and practiceallows you toapply what you learn directly in your work, while also bringing questions from practice into lectures and discussions with our experts. Ourelective modulesfurther emphasize the program's flexibility.
